EMERALD TITANIUM CONDENSING UNITS

This titanium condenser has a reversing valve, pressure switches, and service ports centrally located for easy maintenance access from any side. Vibration-isolating compressor mounting system reduces noise and vibration. Pair this with a Dometic Emerald TurboVap R-410A evaporator. The 6k BTU through 16K BTU is now available in dual frequency (50/60hz).

SQUARE CHASSIS
EASY INSTALLATION

DUAL FREQUENCY
ACCEPTS 50 OR 60 HZ

QUIET OPERATION
MINIMAL VIBRATION

115V/50 - 60Hz/1-Ph
230V/50 - 60Hz/ 1-Ph or 3-Ph
220 - 240V/ 50Hz/ 1-Ph
460V/ 60Hz/ 3-Ph
380V/ 50Hz/ 3-Ph

6,000 - 72,000 BTU

Mobile living made easy.

INNOVATIVE CHASSIS CONQUERS INSTALLATION CHALLENGES

The Emerald design increases cooling and heating capacities while reducing amperage. Emerald condensers can be installed quickly and easily. The drain, seawater and refrigerant connections are conveniently located to overcome installation challenges thus reducing installation time by up to fifteen minutes. The electrical box can be easily removed and located up to 5 ft. (1.5 m) away, further reducing the size of the unit while making the system more accessible. The reversing valve, pressure switches and service ports are centrally located, high on the unit for access from any side.

After listening to boat builders, global service teams and boat owners, Dometic engineers designed the innovative Emerald Condenser series to harness and maximize the impressive performance of R-410A refrigerant while meeting all international

¹ For dual frequency units 6K through 16K, to complete the model numbers for a specific voltage/cycle/phase, add a '-410', then '1171' for 115V/50-60Hz/1-Phase, or '-2371' for 230V/50-60Hz/1-Phase (e.g. 'DEG12-410 2371'). For ranges 24K through 72K, add a '-410', '-2251' for 220-240V/50Hz/1-Phase, or '-2361' for 230V/60Hz/1-Phase (e.g. 'DEU24-410 2361').

² BTU and electrical data are based on a 45°F/7.2°C evaporator and 100°F/37.8°C condenser in cool mode, and a 45°F/7.2°C evaporator and 130°F/54.4°C condenser in heat mode.

³ For ranges 24K through 72K, 60Hz units must not operate at 50Hz and 50Hz units must not operate at 60Hz unless data plate says otherwise.

⁴ All weights ± 10%.

clean air standards. The compact design of the Emerald series incorporates built-in vibration-isolating mounts, two large drain connections and numerous mounting options for installation to a smooth deck, stringer or existing rack. The incorporated lifting handles and smooth bottom allow for easy lifting and quick placement of the unit. The molded composite no-rust drain pan is shaped to provide positive drainage even when the boat lists or pitches. The amount of standing water in the drain pan is reduced by up to 85%, which is 8 times less than a typical drain pan.

Benefits Of The Emerald Condensing Unit

- DEGX6K through 16K operates at 50 or 60Hz; low voltage units will run 100-120 volts
- 50/60Hz and higher voltage units will run 200-240 volts 50/60Hz
- Split-gas system confines compressor noise to the engine room and places quiet evaporating units in living areas
- Square chassis for easy installation in tight spaces. Reversing valve, pressure switches, and service ports centrally located for easy maintenance access from any side
- Rust-free composite drain pan
- Reconfigurable chassis allows optimal drain connections
- Compressor vibration-isolation mounts minimize noise and vibration
- Built-in refrigerant line filter drier protects the compressor from moisture and contaminants

1. Square Chassis And Composite Drain Pan

Compact base fits in more spaces.

2. Easy Access

Easy maintenance access from any side.

3. Vibration Isolation

Less vibration for quieter operation.
